BOMB BIN

Bomb bin for depositing suspicious objects

The Force Ware Bomb Bin is designed for use in public and commercial areas. Especially post room staff are generally considered to be at greater risk of terrorist attack through letter or parcel bombs. The Bomb Bin suppresses the effects of explosive devices by directing the blast. It reduces the risk of injury to personnel and damage to property from primary and secondary fragmentation. The Composite construction withstands blast and fragments from IEDs containing up to approx. 500 g (1.10 lbs) of PE4 (C4).

The content of the bomb bin can be easily X-rayed. Therefore, the removable inner bag is designed to position a suspect device upright to allow X-Ray inspection whilst in the container. The Bomb Bin can also be easily carried on a pallet.

- ✓ Designed for depositing suspicious objects
- ✓ Withstands blast and fragments from IEDs containing up to app. 500 g (1.10 lbs) of PE4 (C4)
- ✓ Easily removable inner bag
- ✓ Detachable base plate
- ✓ High quality composite construction

DATA SHEET

Bomb Bin

TECHNICAL DATA

Article number	1100310
Color	Orange
Weight	Approx. 50 kg (110.23 lbs)
Protection	Composite construction withstands blast and fragments from IEDs containing up to app. 500 g (1.10 lbs) of PE4 (C4)
Inside diameter	50 cm (19.66 in)
Wall thickness	18 mm (0.71 in)
Height	90 cm (35.43 in)
