PROTECTION HELMET FWH3

Protection helmet against fragments and handgun bullets

The Protection Helmet FWH3 is a modern protection helmet fulfilling requirements of ballistic protection for security forces. The helmet is also known to be used by United Nations Peacekeeping Forces. The shell is made from high quality aramid fiber. Its parts are resistant to all weather conditions. All elements in the helmet are attached without drilling holes. This so-called boltless shell system eliminates weak points leading to a better protection.

- ✓ High protection level
- ✓ Quality boltless shell
- ✓ Excellent suspension system with 3-point link system
- ✓ Chin belt with reduced force on the chin and quick release catch
