

Demining Apron

Art.-No.: 1020012

Features:

- Protection level $v_{50} = 450$ m/s, according to STANAG 2920
- Throat protection
- Very light, comfortable to wear
- Suitable for operations in tropical areas
- Inner material consists of multi-layer polyamide covered by a Cordura® textured nylon outer cover
- Standard colours NAVY blue and UN blue

DESIGN

The Demining Apron has 2 collars to allow it to be used in both the kneeling and prone positions without alteration. Being open backed for coolness with its weight being borne by the hips makes it comfortable to wear and easy to put on or remove.

The collars are designed to stop the ingress of the blast thus augmenting the protection offered by the visor.

A removable, washable cover made of Cordura® Textured Nylon is designed to last the life of the armour and is polyurethane coated for water repellancy. Frontal protection is provided from the shoulders to the lower thigh / knee area.

DIMENSIONS AND WEIGHT

Weight: 4 kg

Size: 91 x 48.5 cm

Packing size: 30 x 50 x 7 cm

Visor not included
