

Bomb Bin

Article No.: 1100310

DESCRIPTION

Force Ware blast protecting products are designed for use in public and commercial areas. Post room staff are generally considered to be at greater risk of terrorist attack through letter or parcel bombs. The Bomb Bin suppresses the effects of explosive devices by directing the blast, reducing risk of injury to personnel and damage to property from primary and secondary fragmentation. Full technical specifications and performance certificates supplied on request.

FEATURES

- Constructed to isolate letter bombs and suspect packages
- Can be easily X-rayed (the removable inner bag is designed to position a suspect device upright to allow X-Ray inspection whilst in the container, datum points on the outside allow X-Ray to be taken at specific points)
- Detachable base plate provides protection to the floor when in the upright position
- Composite construction withstand blast and fragments from IED devices containing up to app. 500 g of PE4.
- Easily carried or rolled (the outside of the main unit is fitted with rubber tyre rings to allow the tube to be rolled away from a sensitive area without removal of the package, the inner bag is fitted with handle loops to allow easy removal of the package for safe transportation)

SPECIFICATIONS

Blast protection:	Withstands blast and fragments from IED with up to app. 500 g PE4
Inside Diameter:	50 cm
Wall Thickness:	18 mm
Height:	90 cm
Weight:	50 kg
Colour:	Orange
